### OWNER

Department of Veterans Affairs

GEOCON was enlisted to provide testing and inspection services for the construction of a 70,000 square foot VA medical building in Crown Point, Indiana, replacing the former clinic, which was built in 1988. The new clinic offers increased services and upgraded technology to better serve veterans, providing both primary and specialty care, including services in mental health, cardiology, gastroenterology, infectious diseases/HIV, optometry, ophthalmology, rehabilitation medicine, neurology, podiatry and a variety of surgical subspecialties.

The new clinic was built with the next generation of veterans in mind, with a new women's health care suite, more exam rooms, upgraded radiology equipment utilizing the latest software, and new audio booths.

### Partial Listing of Services Provided:

- Footing subgrade inspections
- Soil and aggregate compacting test
- Fresh concrete testing and monitoring
- Concrete compressive strength testing
- Floor flatness/levelness testing
- Structural steel inspections
- Asphalt density testing
